Correction to: Psychosocial issues discovered through reflective group dialogue between medical students

Shao-Yin Chu^{1,2}, Chi-Wei Lin^{3,5*}, Meei-Ju Lin³ and Chin-Chen Wen⁴

Correction

Following publication of the original article [1], the authors reported that they had mistakenly put the wrong IRB number in the last paragraph of the *Methods* section (as IRB NO.: IRB101–80 instead of IRB102–20 as given in the *Ethics approval and consent to participate in Declarations*). The corrected last paragraph on the Method section should read as follows:

“Ethical approval was obtained from the institutional review board at Buddhist Tzu Chi General Hospital (IRB102-20). Informed consent was received from all participating medical students.”

Furthermore, they found that the name of the first author (Shao-Yin Chu) was not listed in both sets of *Author Comments* (21 Nov 2017, 18 Dec 2017) in their paper’s *Open Peer Review Reports* (<https://bmcmmededuc.biomedcentral.com/articles/10.1186/s12909-017-1114-x/open-peer-review>), where the correspondence author’s name (Chi-Wei Lin) was listed twice.

Author details
